

# User Roles

02/04/2026 9:57 am MST

## Overview

There are 4 user access levels available in DocBoss: View, Review, Full and Admin. User roles are default permission sets available to users. (To limit individual users' access beyond their default role access limits, see the article on [User Permissions](#).)

- **View:** Generally for project managers/supervisors.
  - Access to all reports, documents, etc.
- **Review:** Generally for engineers/drafters.
  - All view functions, plus:
  - Upload documents to assigned cards, and participate in review routing/approvals, file markups, and vendor reviews.
- **Full:** Generally for doc control, inside sales, and/or project coordinators.
  - All review functions, plus:
  - Create submittals, setup/edit projects.
- **Admin:** Generally for doc control leads, project management leads, and/or IT.
  - All full functions, plus:
  - Add new users, create templates, define system settings/project defaults.
  - *Note: Any full user can be assigned administrator privileges.*

Below is a list of default permissions for each role:

API		View	Review	Full	Admin	+ Security
Add API connection						✓
Authentication		View	Review	Full	Admin	+ Security
Enable MFA (for users and/or submittal recipients)						✓
Enable requirement for submittal recipient authentication						✓
Enable MFA for submittal recipients on project (when required at admin)				✓	✓	✓
Disable MFA for submittal recipients on project (when required at admin)						✓
View authentication log						✓
Download data from authentication log						✓
Companies		View	Review	Full	Admin	+ Security
