

Enable Support Access to your Account

08/02/2024 11:13 am MDT

Users must grant permission for DocBoss Support to access their account. Access permission is granted for up to 24 hours at a time.

To enable support access, click the settings gear and select **Allow support to access your account**.

Under the option to **Allow DocBoss Support to access your account for 24 hours**, select **ON** to grant support access.

Access can be revoked at any time by selecting **OFF**.

If this option is not available, this is due to a security setting in the instance which, if enabled, only allows admin users who have the Security permission to grant support access. To change this, the admin user can navigate to **Security Settings** and enable **Allow other users to grant system access to DocBoss support**
