

# Adding Contacts

04/25/2025 11:50 am MDT

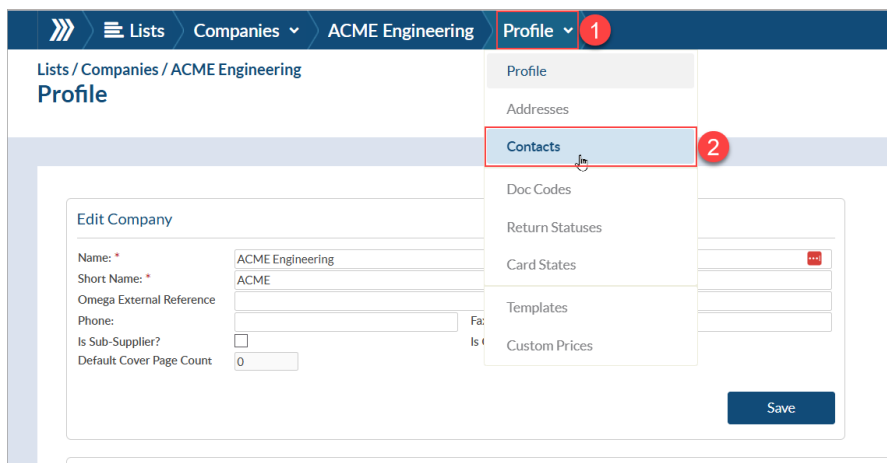

Adding contacts to company profiles allows you to create a relationship between a contact and a company. In doing so, these contacts can be defined on projects involving the company (**Project Menu > Set Up > Project Main > Users and Key Contacts**).

Contacts defined on projects can be easily added to distribution lists (see article: [Distribution Lists](#)), and their names can auto-generated on output templates (e.g., cover page, transmittal, SDI, etc.).

To add a contact to a company profile, navigate to **System Menu > Lists > Companies**.

From the companies screen, select the company you wish to add a contact(s) to. Once in the company profile, navigate to **Company Menu > Contacts**.

## Add a new contact

To add a new contact, click the "+" icon above the grid. In the form, the company name will be pre-filled, and the contact will need to either be (1) created by clicking "+Add," or (2) selected from the pre-existing list of contacts (**System Menu > Lists > Contacts**).

The screenshot shows the 'Add Relationship' dialog in the DocBoss system. The 'Company' field is set to 'ACME Engineering'. The 'Contact' field is a dropdown menu with a red circle '2' pointing to it. A red circle '1' points to the '+ Add' button next to the 'Contact' dropdown. An inset window shows the 'Add Contact' dialog with 'First name' and 'Last name' fields. The main dialog also includes fields for 'Password', 'Confirm password', 'Allow all projects access', and 'Projects'.

**By adding a contact to a company profile, a relationship is being created between the contact and the company.**

If the contact already exists, they likely already have a relationship with a company in your system. DocBoss allows the same contact name to be connected to multiple customers, if required.

Once a contact is added/selected, fill in the remaining data fields ( \* signifies that the field is mandatory):

1. **Email:** Enter customers email address if you want the ability to select them for distribution lists (this is not mandatory)
2. **Job Title:** Enter customers job title, this will be required to be entered when creating your distribution list. It is not mandatory but avoids entering in the future.
3. **Allow web access:** Enable this field to allow the access to the Customer Web Access/Portal. See this article for more information: [Enable Customer Portal Access](#).

**Note:** Contacts can also be added to company profiles from the following pages:

1. Relationships (**System Menu** > **Lists** > **Relationships**)
2. Distribution Lists (**System Menu** > **Admin** > **Distribution Lists**)
3. Project Main (**Project Menu** > **Set Up** > **Project Main** > **Users and Key Contacts** > **Customer/End User Contacts**)
