

Attach Compilations/TOC to a Doc Code

09/16/2024 1:43 pm MDT

If you want to use the DocBoss generated version of the Compilation and/or the TOC for your submission, you must attach it to the applicable Doc Code in the Requirements grid.

Navigate to the Code List

Step 1 Set applicable Doc Code(s) to TYPE = Compilation

Step 2 Click attach icon that appears in Tools column (will only be available if Type = Compilation)

Step 3 Select applicable compilation from list in pop up window (you may set up multiple compilations per project)

*Step 4 - If you are attaching **only the TOC** you must click "Attach Table of Contents only" below your selection grid.

Step 5 - Click Attach

The screenshot shows the 'Code List (Requirements)' grid in DocBoss. The grid has columns for Select, Tools, Doc Code I, Doc Code Name, Required, Level, Type, Stage List, Eq#, and Cover Page / Stamps. The rows are: A01 Vendor Document Register (Type: Generated (Wolfe)), B01 General Arrangement Drawings (Type: Generated (Sub-Supplier)), I04 Inspection and Test Plan (Type: Generated (Sub-Supplier)), S06 Manufacturing Data Book (Type: Compilation), and S07 Manufacturing Data Book Index (Type: Compilation). A pop-up window titled 'Select the Compilation to Attach' is open, showing a search bar and a table with columns: Select, Doc Name I, Description, and Type. The table contains one row: 'Manufacturer's Record Book' (Type: Regular). Below the table is a checkbox for 'Attach Table of Contents only' and an 'Attach' button.
