

Enable Manual Cards

07/23/2024 3:17 pm EDT

How to Enable Manual Cards

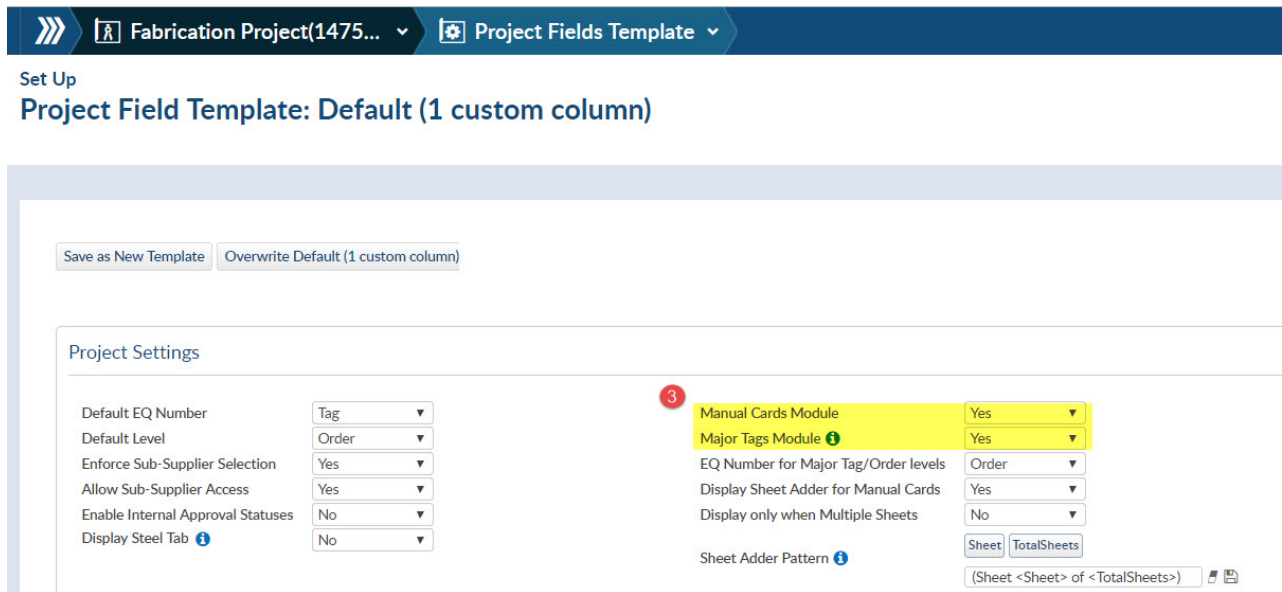

To add manual cards to a project, you must first ensure the manual card module has been enabled in your project.

To find this option, navigate to Project menu > Set Up > Project Fields Template.

From here, you can select "yes" from the dropdown menu to enable the manual cards module.

You can also enable the major tags module from here if that is required for your project.

If you do not see these options, the feature has not been enabled for your instance. Please contact our support team (support@docboss.com) for assistance.
