# Enable Manual Cards

10/01/2025 12:02 pm MDT

How to Enable Manual Cards

To add manual cards to a project, you must first ensure the manual card module has been enabled in your project. To do this, navigate to **Project Menu > Set Up > Project Configuration**.

From the "Advanced" tab, expand the "Feature Management" section and click to enable the manual cards option.

The option to enable the major tags module is also available here if that is required for your project.

If you do not see these options, the feature has not been enabled for your instance. Please contact our support team (support@docboss.com) for assistance.
