

Generate Databooks

04/13/2026 1:26 pm MDT

Create databooks in minutes

Generate final databooks (MRB, Mud Book, Quality Dossier, etc.) with a single click, including all required metadata and structured in the exact way your customer expects.

What is a compilation in DocBoss?

A **compilation** is a collection of documents that are submitted in a single file, usually as a PDF with a table of contents. Compilations are used to create the final book for submittal to the customer.

See it in action

This video walks through the process of creating a compilation (e.g., Databook) in DocBoss:

Generate databooks with ease

DocBoss makes it easy to create and generate databooks. The process is quick and simple, saving you time and manual work.

Multi-add documents

Documents with the same code can be added to the databook all at once, saving you time.

Customize the structure

Meet your customer's requirements by adding sections, title pages, a table of contents, and/or a cover page.

Preview the book

Once you've built the structure, generate a preview of the full book (or just the table of contents) with the click of a button.

How to create a databook

Create your databook in three simple steps:

Step 1: Create a compilation

Step 2: Add the required sections and documents into the structure

Step 3: Generate the book
