Produce documentation *their* way

Customize approval and issue purpose codes (IFI, IFA, etc.) to match your customers' and ensure they see all outputs using terms they understand.

Return statuses

Create return status lists for each customer you supply to. Does the company have multiple different status lists? No problem - you can add multiple lists per company.

Issue purposes (IFI, IFA, etc.)

Set up different stage lists to move through issue purposes automatically, and configure each stage to match the terminology of your customer.

Mid-project changes

Customer looking to see different terms than what was originally requested? Make adjustments whenever you need.
