Submit documentation *their way*

Effortlessly apply custom headers, footers, and file names to any document (even locked files) to meet your customer's specifications.

Apply headers/footers

Gone are the days of adding headers/footers to documents manually. Choose the data you'd like to see, the font size, margins, etc., and DocBoss will apply them for you!

Automated file naming

DocBoss automatically renames your files following a pattern you choose. Naming can be customized using parameters and formulas, meeting your exact needs.

Unique to each target

Does your customer require a different naming convention than your sub-supplier? No problem - you can set a pattern for each target to meet each requirement.
