

Save and Reuse Complex Structures

04/13/2026 4:29 pm MDT

Apply your preferences with the click of a button

Save custom databook structures for future projects, reducing setup time and ensuring consistency across multiple projects or shipments.

Save a new layout

Once you've configured the settings to your preferences, you can save the layout for use on future projects, saving you time.

Apply an existing layout

Choose your preferred layout at the time of compilation creation. Selected the wrong one? No problem - you can change the default layout after creation, too.

Edit the structure

Need to make slight adjustments? Changes made to the layout will only be applied to the current compilation (but can also be applied to the default layout, if desired).
