Easily customize the databook structure

When building databooks, need to remove cover pages? Add title pages, sub-sections, or some other nitty gritty detail? One click is all it takes.

Add/remove cover pages

Need to remove cover pages from each document? Or, must you add cover pages to documents which were not individually submitted? Both situations (and more!) can be achieved with the click of a button.

Include title pages

Title pages (in the customer's preferred format) can be included for each section of the book automatically. If only specific sections require a title page, this can also be accommodated.

Sub-package documents

In cases where the databook should be organized by a specific equipment value (e.g., item/model), DocBoss can group the applicable documents accordingly.
