

Track Every Download

04/15/2026 4:34 pm MDT

Keep tabs on your documents, no matter where they are

Get notified when customers download files (and receive alerts if they don't) so you can avoid delays and keep projects on track.

Review download history

See which submittals have been downloaded at a glance, and gain access to detailed download history. DocBoss provides a list of those who have downloaded the link, including the date/time.

Receive automated reports

Monitor the status of submittals across projects with a recurring report, keeping you informed on those which have not yet been downloaded.

Refresh links

To keep your files secure, download links expire after a set period of time. If the customer has yet to download the submittal by the expiration date, it can be refreshed in a single click.

Manage documentation with DocBoss

Book a [personalized demo](#) with one of our Product Specialists today to see how these features can be customized to suit your company's needs.
