

SSO and Provisioning

04/17/2026 12:03 pm MDT

Streamline access to your document control system

Simplify login and access management across your organization with optional single-sign on (SSO) and optional user provisioning via SCIM.

What is single-sign on (SSO)?

SSO is a method of user authentication via an external identity provider. It allows users to log in to multiple services using a single set of credentials (username and password).

Leverage your existing infrastructure

DocBoss supports multiple identity providers, making it easy to keep the sign-in experience (and your user data) consistent.

Supported providers include:

Microsoft Entra ID

Okta

Ping Identity
