

# Troubleshooting: Grid Scroll Bar

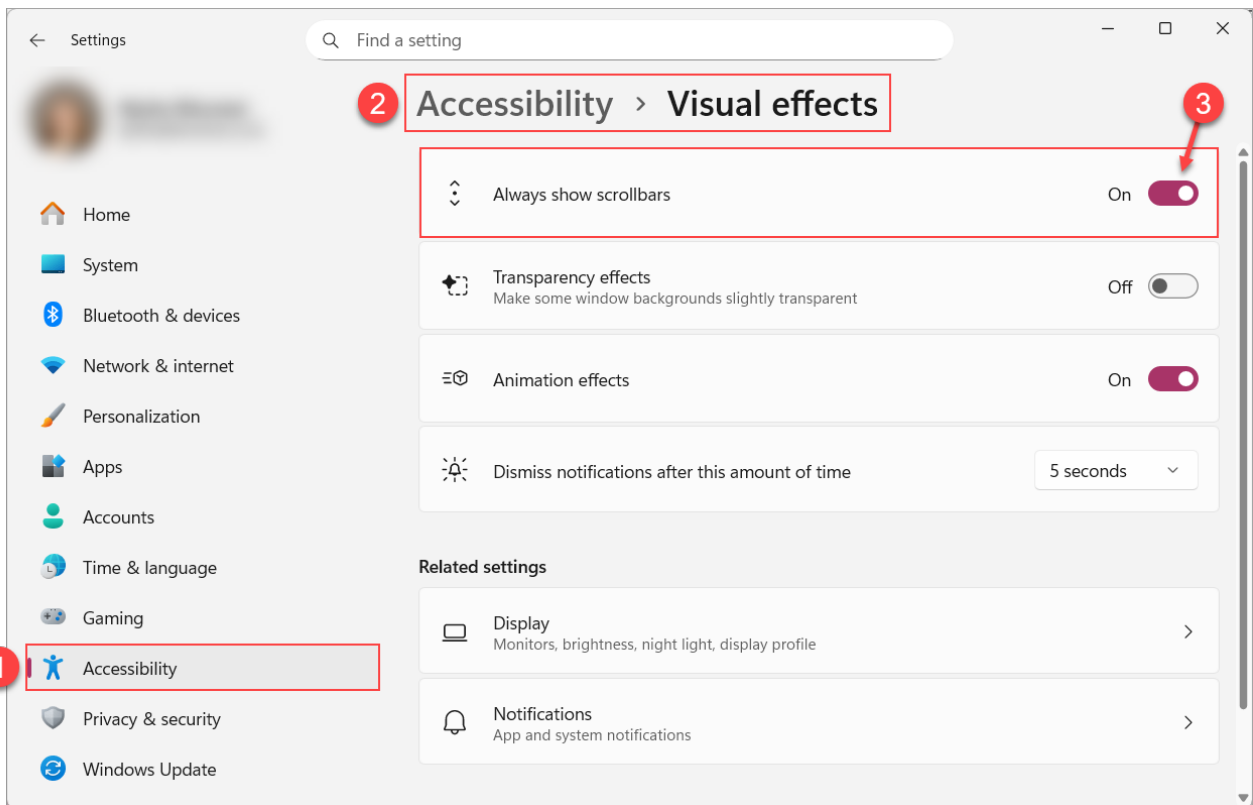

10/28/2025 2:07 pm MDT

In some browsers (e.g., Firefox), the grid scroll bars may be hidden and only appear when hovering over the bottom of the grid.

The screenshot shows a software interface for a 'Pump Project (1234) Card List'. It features a table with columns for Tools, Document, Required, Locked, Doc No. (Omega), Doc Code, Card Name (Auto), Title, Status (Combined), Stage, and Doc Code Type. The table contains 16 rows of data. A red arrow points to the bottom of the grid, where a scroll bar is visible. Below the table, there are controls for 'Select page', 'Show on page', 'Items on page', and 'Total found'. There are also checkboxes for 'Set Required' and 'Select all' options.

To ensure that the scroll bars are always visible, there is local (computer) accessibility option to always show scroll bars. On Windows 11, this option is available from **Settings > Accessibility > Visual effects > Always show scrollbars**.

The screenshot shows the Windows 11 Settings application. The 'Accessibility' section is selected in the left sidebar. The 'Visual effects' section is expanded, and the 'Always show scrollbars' option is highlighted with a red box. The 'Always show scrollbars' toggle is turned on. Other options shown include 'Transparency effects' (Off), 'Animation effects' (On), and 'Dismiss notifications after this amount of time' (5 seconds). The 'Related settings' section includes 'Display' and 'Notifications'.
