

Document Number Suffixes

10/19/2026 4:01 pm MDT

There are two suffixes that may show beside document numbers on the Card List: an "M", and/or a "D". These suffixes are explained below.

Suffix M

An "M" will show beside a document number when the number has been manually modified (and is no longer following the auto-numbering format set on the project - see article: [Auto-Numbering Format](#)). If this was done in error, typing [clear] in the grid (or in the CSV) will reset the card back to an auto-generated value (see article for more details: [Update Document Numbers](#)).

	Tools	Card Name(Auto)	Doc No. (Omega CAN) ↑	Doc Code ↓
				(1) J01 Operatin ×
☐		J01_123ABC456DE	0001234-J01-001-01	J01
☐		J01_234ABC567DE	0001234-J01-002-01	J01
☐		J01_345ABC678DE	0001234-J01-003-01	J01
☐		J01_456ABC789DE	0001234-J01-004-01	J01
☐		J01_567ABC891DE	0001234-J01-005-01-Updated ^M	J01

Suffix D

A "D" will show beside a document number when the number is a duplicate to another card on the project. To quickly review if there are any duplicate document numbers on a project, filter the column to "Show duplicates only".

If both "M" and "D" are shown as a suffix, it means the document number was both manually modified and is also a duplicate to another card on the project.

	Tools	Card Name(Auto)	Doc No. (Omega CAN) ↑	Doc Code ↓
				(1) J01 Operatin ×
☐		J01_123ABC456DE	☐ Show duplicates only	
☐		J01_234ABC567DE	0001234-J01-002-01	J01
☐		J01_345ABC678DE	0001234-J01-003-01	J01
☐		J01_456ABC789DE	0001234-J01-004-01 ^D	J01
☐		J01_567ABC891DE	0001234-J01-004-01 ^{M D}	J01

Note that only cards which are **marked as required** will be considered when identifying duplicates. In addition, cards which are included as part of merged sets will not be considered when identifying duplicates.
